EDUCATION

California Polytechnic State University San Luis Obispo

B.S. in Computer Science

GPA: 3.5/4.0

Expected May 2027

San Luis Obispo, California

Relevant Coursework: Data Structures & Algorithms, Systems Programming, Computer Security, Programming Languages

EXPERIENCE

Software Engineering Intern

Jan 2026 – Present

Cal Poly Bailey College of Science and Mathematics

San Luis Obispo, California

- Built an internal media management system for 58,579 media files, automating batch ingestion, metadata driven organization, validation, and failure recovery.
- Engineered a resumable Microsoft Power Automate migration workflow for 455 GB of media using persistent migration state, automated retries, duplicate detection, and collision-safe writes.
- Designed searchable metadata and review state workflows for a growing library of 17,000+ assets, supporting staff discovery and governance while keeping media within Cal Poly-managed systems.

Technology Solutions Research Intern

July 2025 – March 2026

Foundation for California Community Colleges

Los Angeles, California

- Analyzed financial aid and demographic records across 6 California community colleges using data from the state Chancellor's Office database to identify trends in FAFSA access and student outcomes.
- Conducted focus groups with community college students about their FAFSA experiences, synthesizing qualitative feedback to identify recurring barriers and pain points in the financial aid process.
- Combined quantitative and qualitative findings into a research report for external stakeholders, documenting student experiences and evidence based themes around financial aid accessibility.

AI Document Insights Extern

Feb 2025 – Apr 2025

Extern

Los Angeles, California

- Built a Python RAG pipeline for mortgage document Q&A using LlamaIndex, Ollama, and Gemini API to ingest documents and retrieve grounded context.
- Evaluated open source models and retrieval configurations, tuning chunking, retrieval, and prompting strategies to improve document Q&A quality.
- Implemented the end to end ingestion, embedding, retrieval, and generation workflow in Python, presenting the completed system to Outamation stakeholders.

PROJECTS

Guppty Programming Language | Project Site

Rust

- Built an indentation-based language in Rust with a lexer, parser, bytecode compiler, stack VM, closures, recursion, and control flow.
- Added a tree-walking interpreter and CI differential tests across 30+ programs, requiring both backends to produce identical output.

Gitex | Live App

TypeScript, React, JavaScript

- Built a codebase Q&A platform with Gemini embeddings and Convex vector search, with 31-case RAG evals gating citation groundedness, retrieval recall, and refusals in CI.
- Engineered auth, billing, rate limits, and security with Clerk and Stripe, validated by 160+ tests and CI-gated retrieval evaluations.

SKILLS

Languages: Python, TypeScript, JavaScript, Rust, Java, C, C++, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, Tailwind CSS, Vite

Databases & Infrastructure: PostgreSQL, Redis, Convex, Docker, Celery, Prometheus, Grafana

Developer Tools: Git, GitHub Actions, GitHub Copilot, Claude Code, Codex, Cursor, Unix/Linux, Microsoft Power Automate, Asana

AI & Retrieval: LlamaIndex, Gemini API, Ollama, RAG, Embeddings, Vector Search
