EDUCATION

California Polytechnic State University, San Luis Obispo

B.S. in Computer Science

GPA: 3.5/4.0

Relevant Coursework: Data Structures & Algorithms, Systems Programming, Databases, Computer Security

Expected May 2027

San Luis Obispo, California

EXPERIENCE

Cal Poly Bailey College of Science and Mathematics

Jan 2026 – Present

Web Development Intern

San Luis Obispo, California

- Built an internal digital asset management system with SharePoint and Power Automate, automating batch ingestion, metadata indexing, duplicate detection, validation, and failure recovery.
- Engineered a resumable migration pipeline for 58,579 media records with persistent state, collision-safe writes, automated retries, and source traceability while preserving data integrity.

Foundation of California Community Colleges

July 2025 – March 2026

Technology Solutions Research Intern

Los Angeles, California

- Analyzed statewide education datasets for the Technology Solutions team, transforming enrollment, demographic, and financial-aid data into 10+ stakeholder-facing visualizations and actionable insights.
- Built reusable data-processing and validation workflows for a 6-person research team, standardizing data cleaning and reporting to improve accuracy, reproducibility, and delivery speed.

AI Document Insights Extern

Feb 2025 – Apr 2025

Extern

Los Angeles, California

- Built a Python RAG pipeline with LlamaIndex, Ollama, and Gemini API to ingest mortgage and lease documents, generate embeddings, and retrieve grounded context.
- Evaluated open-source AI models and optimized chunking, retrieval, and prompting strategies, presenting the final document intelligence system to Outamation stakeholders.

PROJECTS

Guppty Programming Language | Documentation

Rust

- Built a programming language in Rust with a lexer, parser, bytecode compiler, and stack VM, supporting closures, functions, control flow, and span-aware runtime errors.
- Engineered dual interpreter and VM execution backends with 38+ tests and CI-enforced differential testing to guarantee identical program behavior.

Gitex | Live Demo

TypeScript, React, JavaScript

- Built a GitHub codebase Q&A platform with Gemini embeddings and Convex vector search, achieving 100% groundedness and refusal accuracy across 31 retrieval evaluation .
- Engineered production-grade auth, billing, rate limiting, and AI security controls with Clerk, Stripe, and 160+ automated tests, enforcing retrieval evaluations through CI.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Java, C, C++, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, Tailwind CSS, Vite

Databases & Infrastructure: PostgreSQL, Redis, Convex, Docker, Docker Compose, Celery, Prometheus, Grafana

Developer Tools: Git, GitHub, GitHub Actions, Unix/Linux, Jira, Jupyter Notebook, VS Code, IntelliJ

AI/ML Tools: Claude Code, Codex, ChatGPT, Cursor, Gemini API, Ollama
